## ASYMPTOTICS FOR EXTREMAL POLYNOMIALS WITH VARYING MEASURES*

M. BELLO HERNÁNDEZ ${ }^{\dagger}$ AND J. MíNGUEZ CENICEROS $\ddagger$

#### Abstract

In this paper, we give strong asymptotics of extremal polynomials with respect to varying measures of the form $d \sigma_{n}=\frac{d \sigma}{\left|Y_{n}\right|^{p}}$, where $\sigma$ is a positive measure on a closed analytic Jordan curve $C$, and $\left\{Y_{n}\right\}$ is a sequence of polynomials such that for each $n, Y_{n}$ has exactly degree $n$ and all its zeros $\left(\alpha_{n, i}\right), i=1,2, \ldots$, lie in the exterior of $C$.

Key words. Rational Approximation, Orthogonal Polynomials, Varying Measures.
